

JLG Forklift Part

JLG Forklift Parts - In the late 1960's John L. Grove, with his wife Cora set out on a cross country voyage in their RV. Freshly retired, after spending numerous years working with his brother to assemble their crane company into an market leader, John had no idea that momentous trip would allow JLG Industries, Inc to emerge. The world leader of mobile aerial work platforms and precision materials handling technologies was the end result of a road expedition.

Whilst on their journey, John spent time conversing with past business contacts whom the Groves stopped to visit along the way. These conversations combined with a tragic incident-two workers being electrocuted on scaffolding when the Groves were traveling to the Hoover Dam- John uncovered a substantial market for a product that could promptly and securely elevate people in the air to accomplish maintenance and other building functions.

Following their return from vacation, John set up a partnership with two of his friends and purchased a metal fabrication company in McConnellsburg, Pennsylvania. Opening with a small crew of twenty workers, they fashioned and sold their first JLG aerial work platform in 1970. The company incorporates some of the simple design essentials of that original lift into current versions.

JLG lift trucks have come a ways from the time when Mr. John L. Grove came back to town from his cross-country road trip and since the initial aerial work platform debuted on the market. Nowadays, the company proudly continues to expand itself into many markets globally and develops new products to make certain consumers are capable of being more efficient and perform in the workplace within a safer atmosphere.
